## Global link popularity of web site

### Essential

The global link popularity measures how many web pages link to your site. The number of web pages linking to your site is not as important as the quality of the web pages that link to your site.

All major search engines take the quality and the context of the links into account. Search engines assume that your web page must offer relevant content if many quality sites link to it.

### Number of inbound links according to these search engines (the more the better)

	Alexa	Google.co.uk (without Places)	Google.com	Yahoo.co.uk (All of the web)	Yahoo.com	Peak Value
To Your Site:	2	0	0	0	0	2
To Site 1:	15,777	0	0	0	0	15,777
To Site 2:	1,801	0	0	0	0	1,801
To Site 3:	1,801	0	0	0	0	1,801
To Site 4:	2,565	0	0	0	0	2,565
To Site 5:	3,043	0	0	0	0	3,043
To Site 6:	370	0	0	0	0	370
To Site 7:	1,902,951	0	0	0	0	1,902,951
To Site 8:	11,338	0	0	0	0	11,338
To Site 9:	138	0	0	0	0	138
To Site 10:	180	0	0	0	0	180
Range:	2 to 1,902,951	all 0	all 0	all 0	all 0	138 to 1,902,951

### Advice for the global link popularity

Summing up all analyzed search engines, there are too few web pages that link to your web site "discountiphones.org". You should increase the number of web pages from different domains that link to your web site. <<

Google cannot find any web site that links to your web site from a different domain. Make sure that Google is able to access your web site and that Google has not banned your web site from its index. <<

## Link texts of inbound links

### Essential

Inbound links are links from other web sites to your site. If many other sites link to your site, then search engines consider your site to be important. However, the number of links is not as important as is the relevance of the linking page and the link text used in linking to your site.

This chapter lists a sample of the web pages that link to your site, along with the link text. Note that search engines do not reveal all inbound links to your site.

### Sample of the web pages that link to your site

Linked Text	Linked URL	Web Page That Links To Your Site
[empty]	<a href="http://discountiphones.org">http://discountiphones.org</a>	<a href="http://flippaleaderboard.com/flipdetails.php?id=2666745">http://flippaleaderboard.com/flipdetails.php?id=2666745</a>
discountiphones.org	<a href="http://discountiphones.org">http://discountiphones.org</a>	<a href="http://flippaleaderboard.com/flipdetails.php?id=2666745">http://flippaleaderboard.com/flipdetails.php?id=2666745</a>

### Advice for the link texts of inbound links

To get a high ranking on Google.com (without Places), make sure that the web pages that link to your site use the search term "blackberry phones" in their link texts. The more links to your web site contain "blackberry phones" (or a part of it) in the link text, the more likely it is that your web site will get a high ranking on Google.com (without Places) for that search term.

It is advisable to use different but related keywords for the link texts. If all links to your web site use exactly the same link text, then Google.com (without Places) might lower your rankings because of unnatural linking patterns.

In addition, the quality and reputation of the web pages that link to your site is very important to the search engines.

At least 10% of the analyzed inbound link texts contain the search term "blackberry phones". This is good.

At least 20% of the analyzed inbound link texts contain the search term "blackberry phones". This is good.

At least 40% of the analyzed inbound link texts contain the search term "blackberry phones". This is good.

Less than 60% of the analyzed inbound link texts contain the search term "blackberry phones". You must increase the number of inbound link texts that contain that search term.

Less than 80% of the analyzed inbound link texts contain the search term "blackberry phones". You must increase the number of inbound link texts that contain that search term.

## Keyword use in body text

### Essential

The body text is the text on your web page that can be seen by people in their web browsers. It does not include HTML commands, comments, etc. The more visible text there is on a web page, the more a search engine can index. The calculations include spaces and punctuation marks.

### Your contents

News Feed Comments Home Amazon Store Programs Videos Sitemap Contact Us Privacy Discount Iphone 4 - 4S Iphone 3gs Apps Iphone Apps Best Iphone Apps we love to have The most crucial features on the iPhone are the speak to present and the accelerometers. For many years now, all Apple laptops have a make contact with pad, which operates in the equivalent way. All of them have a motion sensor made it also, nonetheless I am undecided if it's pretty much as good as a outcome of the accelerometer however. Plus Apple just recently launched the Magic Mouse which might also be get in touch with delicate just like the make contact with pads on laptops and the iPhone screen.

So may possibly this all be primary up to iPhone applications on the desktop? What Makes iPhone Apps Best Apps? Keyword density:	0% to 6%	0%	OK	OK

## Age of web site

### Very Important

Spam sites often come and go quickly. For this reason, search engines tend to trust a web site that has been around for a long time over one that is brand new. The age of the domain is seen as a sign of trustworthiness because it cannot be faked. The data is provided by Alexa.com (or Archive.org if Alexa.com does not have data about a site).

### Dates of the domain registration or of the first contents

### Advice for the web site age

The web site age could not be determined. In general, the older your web site, the better it is for your rankings on Google.com (without Places). If you have a young web site, you must compensate by improving the other search engine ranking factors.

## Keyword use in H1 headline texts

### Very Important

H1 headline texts are the texts that are written between the <h1>...</h1> tags in the HTML code of a web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com (without Places), too.

Example: <h1>your very big headline text</h1>

### Your contents

[not used]

### Advice for your H1 headline texts

#### Search term: "blackberry phones"

	Competitors	Your Site	Advice	
Number of keywords:	0 to 1	0	You could use the search term "blackberry phones" at least once but this is optional.	<
Keyword density:	0% to 100%	0%	You could increase the keyword density for the search term "blackberry phones" but this is optional.	<

#### Search term: "blackberry"

	Competitors	Your Site	Advice	
Number of keywords:	0 to 3	0	You could use the search term "blackberry" at least once but this is optional.	<
Keyword density:	0% to 100%	0%	You could increase the keyword density for the search term "blackberry" but this is optional.	<

### Your contents

discount**iphones** (Domain name: "discount**iphones**.org")

### Advice for the domain name

The domain name discountiphones.org contains only a part of the search term "blackberry phones". This is acceptable.

## Keyword use in page URL

### Important

The page URL is the part after the domain name in the web page address. This chapter tries to find out if Google.com (without Places) gives extra relevance to search terms within the page URL. Separate your search terms in the page URL with slashes, dashes or underscores.

Example: "keyword/another-keyword.htm" is the page URL of <http://www.domain.com/keyword/another-keyword.htm>

### Their contents

Rank	Words In Page URL	URL

## Links from social networks

### Important

On social network sites, people decide which web sites are popular. This means that the popularity on social network sites cannot be easily influenced. For this reason, search engines might trust web sites more if they are popular on social networks. ("n/a" means "data not available".)

### Links from social networks (the more the better)

	Delicious.com	Facebook Mentions	Google +1	Twitter Tweets	Total
To Your Site:	0	3	0	6	9
To Site 1:	0	17,028	5	4,671	21,704
To Site 2:	0	76,151	195	11,194	87,540
To Site 3:	0	76,151	61	11,194	87,406
To Site 4:	0	451	0	170	621
To Site 5:	0	621	4	114	739
To Site 6:	0	137	3	33	173
To Site 7:	0	3,912	18	2	3,932
To Site 8:	0	4,554	1	1,344	5,899
To Site 9:	0	118	1	1	120
To Site 10:	0	309	13	271	593
Range:	all 0	3 to 76,151	0 to 195	1 to 11,194	120 to 87,540

### Advice for the links from social networks

There are too few web pages that link to your web site "discountiphones.org". You should increase the number of web pages that link to your web site on these social networks.

## Server speed

### Important

Popular web sites often have faster server response times compared to smaller unimportant sites. In addition, most search engines index more pages from fast web sites. This chapter shows you how long it takes on average for web pages on the top ranked sites to load. The data is based on the average server speed of the last 30 days and is provided by Alexa.com ("n/a" means that Alexa.com does not have data about your server speed).

### Server speed results

#### Average Page Load Time (measured in seconds, the lower the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
n/a	3.63s	1.89s	1.89s	2.94s	1.33s	4.06s	1.18s	2.54s	5.21s	2.03s	1.18s to 5.21s

#### Server Speed Relative To Other Servers On The Internet (the faster the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
n/a	very slow: bottom 10%	slow: bottom 35%	slow: bottom 35%	very slow: bottom 15%	average: top 45%	very slow: bottom 5%	fast: top 40%	slow: bottom 20%	very slow: bottom 5%	slow: bottom 30%	very slow: bottom 5% to fast: top 40%

### Advice for the server speed

The speed of your web site could not be determined. In general, the faster your web site, the better it could be for your rankings on Google.com (without Places). If you have a slow web site, you should contact or even switch your web hosting provider.

## Keyword use in H2-H6 headline texts

### Important

H2, H3, H4, H5 and H6 headline texts are the texts that are written between the <h2>...</h2>, <h3>...</h3>, etc. tags in the HTML code of your web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com (without Places), too.

Example: <h3>your big headline text</h3>

### Your contents

Keyword density:	0% to 8%	1%	OK	OK

## Keyword use in IMG ALT attributes

### Important

The <img alt> attribute defines an alternative text for an image when the user uses a text browser or when the user has turned off the display of images in the web browser application. Microsoft's Internet Explorer displays the alternative text if the user puts the cursor over the graphic. This chapter tries to find out if it makes sense to include the search term in the <img alt> attributes to improve your rankings.

Example:

## Top level domain of web site

### Important

Web sites with certain top level domains (TLD) are statistically more likely to contain higher quality, trustworthy contents. For this reason, search engines might prefer web sites with restricted TLD (.edu, .gov., .mil) over younger TLD (e.g., .biz, .info, .jobs). In addition, country code TLD (e.g., .ca, .de, .fr) are often preferred in the country's local search results.

### Top level domain results

Your Site	1	2	3	4	5	6	7	8	9	10
.org	.com	.com	.com	.com	.co.uk	.com	.org	.com	.com	.com

### Advice for the top level domain of your web site

Your web site URL [discountiphones.org](http://discountiphones.org) contains the often used top level domain .org. This is neither good nor bad for your rankings on Google.com (without Places).

OK

## Number of visitors to the site

### Important

Search engines might look at web site usage data, such as the number of visitors to your site, to determine if your site is reputable and contains popular contents. The Alexa.com traffic rank is based on three months of aggregated traffic data from millions of Alexa Toolbar users and is a combined measure of page views and number of site visitors.

### Alexa.com Traffic Rank results (the lower the better)

	URL	Alexa Traffic Rank
Your Site	<a href="http://discountiphones.org/">http://discountiphones.org/</a>	Rank #4,806,170
1	<a href="http://www.gsmarena.com/blackberry-phones-36.php">http://www.gsmarena.com/blackberry-phones-36.php</a>	Rank #444
2	<a href="http://us.blackberry.com/">http://us.blackberry.com/</a>	Rank #514
3	<a href="http://us.blackberry.com/smartphones/">http://us.blackberry.com/smartphones/</a>	Rank #514
4	<a href="http://www.fonearena.com/blackberry-phones-prices.html">http://www.fonearena.com/blackberry-phones-prices.html</a>	Rank #4,693
5	<a href="http://www.t-mobile.co.uk/shop/blackberry-phones/">http://www.t-mobile.co.uk/shop/blackberry-phones/</a>	Rank #8,786
6	<a href="http://www.thriftycomputer.com/">http://www.thriftycomputer.com/</a>	Rank #433,445 (least visitors of the competitors)
7	<a href="http://en.wikipedia.org/wiki/BlackBerry">http://en.wikipedia.org/wiki/BlackBerry</a>	Rank #6 (most visitors of the competitors)
8	<a href="http://www.t-mobile.com/shop/phones/?manufacturer=3c2c3562-aa1c-4fe4-a0ca-da5dd8e4bd84">http://www.t-mobile.com/shop/phones/?manufacturer=3c2c3562-aa1c-4fe4-a0ca-da5dd8e4bd84</a>	Rank #1,148
9	<a href="http://mobiles-prices.com/BlackBerry_Phones">http://mobiles-prices.com/BlackBerry_Phones</a>	Rank #36,034
10	<a href="http://www.mysmartprice.com/mobile/pricelist/blackberry-mobile-price-list-in-india.html">http://www.mysmartprice.com/mobile/pricelist/blackberry-mobile-price-list-in-india.html</a>	Rank #10,668
Range		6 to 433,445 (average rank: #49,625)

### Advice for the number of visitors to your site

Your web site discountiphones.org does not appear to attract many visitors because your traffic rank is above #100,000 and you have less visitors than the average of your competitors. This could be disadvantageous to your rankings on Google.com (without Places).

&lt;&lt;

## Keyword use in same domain link texts

### Moderately Important

Link texts are words and sentences that are used as links. Same domain link texts are the link texts of the links that point to a web page on the same domain. This chapter examines if Google.com (without Places) takes search terms in same domain link texts into account.

Example: The HTML tag `<a href="contact.htm">Contact information</a>` contains the same domain link text "Contact information".

**Advice for your same domain link texts****Search term: "blackberry phones"**

	Competitors	Your Site	Advice	
Number of keywords:	all 0	0	OK	OK
Keyword density:	all 0%	0%	OK	OK

**Search term: "blackberry"**

	Competitors	Your Site	Advice	
Number of keywords:	1 to 68	0	You should use the search term "blackberry" at least once.	<<
Keyword density:	1% to 17%	0%	You should try to achieve a keyword density of at least 1%.	<<

**Search term: "phones"**

	Competitors	Your Site	Advice	
Number of keywords:	1 to 27	1	You could use the search term "phones" more than once but	<

### Advice for your same domain link texts

#### Search term: "blackberry phones"

			this is optional.	
Keyword density:	0% to 5%	1%	OK	OK

#### Keywords "blackberry" or "phones"

	Competitors	Your Site	Advice	
Number of keywords:	3 to 71	1	Use the keywords "blackberry" or "phones" at least 3 times.	<<
Keyword density:	1% to 9%	0%	You should increase the keyword density for the keywords "blackberry" or "phones" to up to 9%. You can do this by adding the words "blackberry" or "phones", or by removing some text.	<<

## Keyword use in outbound link texts

### Moderately Important

Link texts are words and sentences that are used as links. Outbound link texts are the texts within the <a>...</a> tags when the <a> tag links to a web page on a different domain. This chapter examines if Google.com (without Places) gives relevance to search terms in outbound link texts.

Example: The HTML tag <a href="http://www.not-your-site.com/about.htm">About the company</a> contains the outbound link text "About the company".

## Keyword use in same domain link URLs

### Moderately Important

Links connect one web page to another. Same domain links are the links in <a href> attributes that point to other pages on the same domain. This chapter examines if search terms in same domain link URLs are relevant to Google.com (without Places).

Example: The HTML tag <a href="contact.htm">Contact information</a> contains the same domain link URL "contact.htm".

Keyword density:	0% to 16%	0%	You could increase the keyword density for the keywords "blackberry" or "phones" but this is optional.	<

## Keyword use in meta description

### Moderately Important

The Meta Description tag allows you to describe your web page. This chapter tries to find out if Google.com (without Places) takes the Meta Description tag into account. Some search engines display the text to the user in the search results.

Example: <meta name="description" content="This sentence describes the contents of your web site.">

Even if the Meta Description tag might not be important for ranking purposes, you should use the Meta Description tag to make sure that your web site is displayed with an attractive description in the search results.

## Number of trailing slashes in URL

### Moderately Important

The number of trailing slashes (/) in the URL indicates where a web page falls in a site's overall hierarchy. If the URL contains many trailing slashes, meaning it is placed in a sub-sub-directory, then the webmaster does not seem to think that the page is important in relation to the other pages.

### Number of trailing slashes

Your Site	1	2	3	4	5	6	7	8	9	10	Range
0	0	0	1	0	2	0	1	2	0	2	0 to 2

### Advice for the number of trailing slashes in your web site URL

The URL discountiphones.org does not contain more or less trailing slashes than the top ranked pages. This means that you do not have to change the number of trailing slashes in your URL.

OK

## HTML validation of web page to W3C standards

### Slightly Important

Web pages are written in special languages called HTML and CSS. Like any language, HTML and CSS change constantly. The World Wide Web Consortium (W3C) is the governing body that establishes what is valid HTML/CSS and what is not. Search engines obey the HTML/CSS standard. If there are errors in the HTML/CSS code of your web page, then search engines might not be able to read everything of your web page.

### Validation results

	Validity
HTML:	63 errors, not valid <a href="http://validator.w3.org/check?uri=http://discountiphones.org/">http://validator.w3.org/check?uri=http://discountiphones.org/</a>
CSS:	no errors, valid <a href="http://jigsaw.w3.org/css-validator/validator?uri=http://discountiphones.org/">http://jigsaw.w3.org/css-validator/validator?uri=http://discountiphones.org/</a>

### Advice regarding the validity of your web site

The HTML code validation of your web page discountiphones.org failed. This means that Google.com (without Places) might not be able to read your web page. You should fix any HTML errors.

## Readability level of web page

### Slightly Important

The Flesch Reading Ease test is a United States governmental standard to determine how easy a text is to read. It measures the approximate level of education necessary to understand the web page content. Higher scores indicate the text that is easier to read, and lower numbers mark harder-to-read texts. Scores among different languages are not comparable.

### Readability results

#### Flesch Reading Ease Score (0-100, higher score means that the text is easier to understand)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
80	100	65	37	n/a	69	59	48	67	60	54	37 to 100

#### Flesch-Kincaid Grade Level (shows the number of years of education required to understand the text)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
3	n/a	7	10	n/a	5	9	9	7	6	10	5 to 10

### Advice for the readability of your web site

The Flesch Reading Ease Score of your web page discountiphones.org is 80. A score of 60 to 80 is considered to be optimal. This means that the text of your web page is easy to comprehend.

OK

## Keyword use in meta keywords

### Slightly Important

The Meta Keywords tag allows you to define which search terms are important to your web page according to your opinion. It should be placed between the <head>...</head> tags in the HTML code of your web page. This chapter tries to find out if Google.com (without Places) gives relevance to search terms in the Meta Keywords tag.

Example: <meta name="keywords" content="keyword, another keyword">

## Keyword use in the first sentence of the body text

### Slightly Important

The first sentence of the body text is the first sentence after the <body> tag in the HTML code of your web page. Some search engines give more relevance to search terms when they appear in the first sentence. Some will use your first sentence as the description of your page on the search result page.

Example: <body>Here goes the first sentence. This text is not the first sentence.

## Keyword use in HTML comments

### Slightly Important

HTML comment tags are "hidden comments" in the HTML code of your web page. They are not visible to the user. This chapter tries to find out if search terms in the HTML comment tags are relevant for a good ranking in Google.com (without Places).

Example: <!-- comments with keywords -->

## Search engine compatibility

This chapter examines the general search engine compatibility of your web page.

### Advice

Search engines need text to index your web pages, to determine the theme of your web site and to produce a site summary. They cannot read what is written on your graphical images or in a Flash movie. Google recommends to create a useful, information-rich site. Fresh, continuously updated content is one of the best ways to ensure that search engines return to your web site (and your visitors, too). Your web page "discountiphones.org" contains 1,296 words which should be enough for search engines.	OK
Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. The search term "iPhone uk newest apps" of your Meta Keywords tag does not seem to be mentioned in the body text of your web page. You should either remove this search term from your Meta Keywords tag, or add the search term to the body text of your web page.	<<
Your web page doesn't use the Meta Refresh tag so there won't be any problems with the search engines in this aspect.	OK
Your web page uses the Meta Robots tag to allow search engines to index your web page.	OK
Your web page doesn't use the Meta Title tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Dublin Core meta tags so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Meta tags twice so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the <title> tag twice so there won't be any problems with search engines in this aspect.	OK
Some search engines and directories don't accept submissions with capitalized letters in the document title or in the meta tags. Your web page doesn't use all capitalized letters in those web page elements so there won't be any problems with the search engines in this aspect.	OK
Your web page uses script code in an external file so you've already minimized the problems with scripts and the search engines.	OK
Your web page uses style sheet code in an external file so you've already minimized the problems with style sheets and the search engines.	OK
Your web page doesn't use frames so there won't be any problems with the search engines in this aspect.	OK
Some search engines consider tiny text (i.e. font size 1) as an attempt to fool the search engines. Some webmasters have abused tiny text in the past to hide dozens of keywords on a web page that human web surfers cannot see. Your web page doesn't seem to use tiny text so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "discountiphones.org" doesn't indicate a dynamically served web page so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "discountiphones.org" doesn't contain any of the special characters "&", "\$", "%", "?" or "=" in it so there shouldn't be any problems with the search engines in this aspect.	OK
Some search engines and directories rank web sites lower that are hosted at free web space providers, or if web sites don't have their own domain name. Some search engines also limit the number of web pages they'll index from a single domain. Your web site doesn't seem to be hosted at a free web space provider. If it does, consider getting your own domain name.	OK

## Factors that could prevent your top ranking

Some ranking factors cannot be measured because the search engines do not reveal the necessary data, or it would be extremely time-consuming to measure the data. Make sure you pay attention to the following factors because they could prevent a top ranking for discountiphones.org on Google.com (without Places).

### Advice

#### Inbound links to your web page

Are the web pages linking to your web page relevant to the search term "blackberry phones"?

How fast does your web page get new links pointing to it?

Do the web sites which link to your page belong to the same content category?

Since when do the links to your page exist?

Is the text surrounding the link to your page relevant to the search term "blackberry phones"?

#### Your web page

How many important links from your other pages point to your web page?

Do the links on your web page point to high quality, topically-related pages?

How often and how many changes do you make to your web page over time? Is your content up-to-date?

How often and how many web pages do you add to your web site?

How long do your visitors spend time on your web page?

#### Search engine result page

Do your competitors on the search engine result page get a manual ranking boost by Google.com (without Places), for example Amazon or Wikipedia?

How many visitors of the search engine result pages click through to your page?

How often do search engine visitors search for your company name or web page URL on Google.com (without Places)?

#### Negative ranking factors (you should be able to say "no" to all the following questions)

Is your content very similar or a duplicate of existing content?

Is your server often down when search engine crawlers try to access it?

Do you link to web sites that do not deserve a link?

Do you use the same title or meta tags for many web pages?

Do you overuse the same keyword or key phrase?

Do you participate in link schemes?

Do you actively sell links on your web page?

Do a majority of your inbound links come from low quality or spam sites?

Does your web page have any spelling or grammar mistakes?

## Table: Number of keywords

This chapter lists the analyzed keyword ranking factors in tabular form.

(LT = link text, LU = link URL, SD = same domain.)

## Table: Ranking factors digest

This chapter shows some of the search engine ranking factors in tabular form. Some of the values may have been abbreviated by using "k" which means that the value must be multiplied by 1000. ("n/a" means "data not available".)
